

## Assignment settings

The Assignment Settings panel is where you set permissions and define how your Assignment will appear to your students. On the dashboard, the darkened icons on the right side of the Assignment header show which settings are currently enabled. To edit any of these settings, click the ellipses button  $\vdots$  and select "Edit Assignment."

After clicking "Edit Assignment," the Assignment Settings panel will open.

**Assignment Name** - The title of the Assignment.

**Assignment Type** - This defines the structure of the Assignment. For more details, see [Assignment Types](#). (Please note that the Assignment Type can't be changed after videos have been submitted.)

**Recording & Feedback Privacy** - Determines if students can see others' recordings and/or feedback. Defaults to Private.

*Private* - Recordings and feedback are only visible to the Presenter and Instructors/Reviewers.

*Closed Peer Review* - Peers see and critique others' recordings, but their feedback is only visible to the Presenter and Instructors/Reviewers. (formerly Peer Critique)

*Open Peer Review* - Peers see and critique others' recordings, and can see everyone's feedback on all submissions. (formerly Peer Critique and All Comments are Public)

**Source media** - This setting is required on **Stimulus** and **Comment Only** assignments. Change the drop-down to "Instructor Selected" to upload, record, or add a file from your Library. If you would like students to submit and respond to their own source media, change the drop-down to "Presenter Selected." For more information, see [Stimulus Assignments](#).

**Availability Date** - The date the Assignment will become visible to students. If no date is selected, the Assignment is available immediately. Please note that if you are using GoReact in an LMS (Canvas, Blackboard, etc.) then this setting is hidden (you will just set this in your LMS instead).

**Due Date** - The date the Assignment is due. GoReact will still allow submissions after the due date, but the submission date will be shown in red to indicate that it was late. Please note that if you are using GoReact in an LMS (Canvas, Blackboard, etc.) then this setting is hidden (you will just set this in your LMS instead).

**Grading & Evaluation** - Either points possible or an [instructor rubric](#). Please note that if you are using GoReact in an LMS (Canvas, Blackboard, etc.), this must match the value in the LMS in order for grade passback to work correctly.

**Multiple cameras (i.e. web conference)** - This setting is available only on **Standard** assignments. Allows up to nine presenters to join a single recording session. For more information, see [Multiple camera assignments](#).

**Allow live review (formerly live event)** - Instructors and Reviewers can provide feedback live at the time of recording. For more information, see [Live review assignments](#).

**Single recording attempt (test)** - Restricts students to only one submission for the Assignment. For more information, see [Test assignments](#).

**Time limit** - Recordings will automatically end at the specified time limit. (Doesn't affect uploads)

**Disable source video rewinding and skipping**- This setting is available only on **Stimulus** and **Comment Only** assignments. Students will not be able to control the source media playback.

**Presenter slides** - This setting is available only on **Standard** assignments. Slide Sync™ allows students to add PDF slides to their video. These slides will be shown side-by-side with the video and can be timed to automatically advance during playback. For more information, see [Adding slides to a video](#).

**Markers** - A set of labels with preset responses. For more information, see [Creating a Marker set](#).

**Student rubrics** - A structured evaluation that students can complete for [Self-Evaluation](#) or [Peer Evaluation](#).

**Instructor attachments** - Add any additional attachments or resources you wish to provide.

**Recording instructions** - (Text or Video) These instructions will be shown before the Presenter records or uploads a video.

**Feedback instructions** - (Text or Video) These instructions will be shown before the Presenter reviews a video.
