

8 Hour Hazardous Materials Permit Required Confined Space Rescue Refresher

Course Description:

This program reviews the learned knowledge from the Confined Space Entry and Rescue courses to meet the annual training requirements for OSHA 29 CFR Part 1910.146, "Permit Required Confined Spaces." This program meets the applicable OSHA & NFPA annual refresher requirements.

Course Objectives:

- Discuss four causes of death from confined space accidents.
- Applicability of OSHA 29 CFR Part 1910.146, "Permit Confined Spaces," and NFPA 1670 to government and private industry.
- Review emergency breathing systems, hazard reduction and monitoring techniques.
- Discuss rehabilitation of rescue teams and "Not Permitted Conditions."
- Application, maintenance, and limitations of rescue equipment.
- Emergency Response Planning emphasizing the Incident Command System.
- Perform or simulate a straight inline 10-foot horizontal, or vertical, or complex confined space drag rescue.

Who should attend:

- All members of confined space entry teams and/or Emergency Response Teams.
- Employees expected to rescue a worker from a confined space.
- Supervisory Personnel, Safety Personnel, Hazardous Waste Site Workers.

Prerequisite:

Participants must have successfully completed a Confined Space Entry and Rescue course(s).

Earned Credentials:

Upon successful completion of the course, participants will earn 8 Continuing Education Units (CEUs) and a certificate verifying successful course completion.
